## Introduction

QTech are delighted to release DATRAN Supervisor version 3.63. DATRAN Supervisor provides an easy to use interface for the complete alarm and system management for the DATRAN VI SCADA system. This release corrects a number of issues plus adds new capabilities.

This release comes with a user friendly Setup Wizard to help simplify installation and will upgrade any existing version of DATRAN Supervisor. Please forward a copy of this document to your IT/IS supervisor.

QTech recommends that all customers with Software Maintenance Agreements (SMA) upgrade to this version of DATRAN Supervisor. The software updates are available to all our SMA holders via the QTech website. Please log on to the members area to download.

The following sections of this document describe the enhancements and the installation prerequisites.

Your feedback on the product and possible future enhancements is always appreciated. Please contact QTech on +64 3 366 3713, or email to [techsupport@qtech.co.nz](mailto:techsupport@qtech.co.nz).

## Prerequisites for Upgrade

- **Compatibility & Installation**

Please ensure your DATRAN VI system has the latest version software installed, refer to the QTech website for the latest release of DATRAN VI. All instances of DATRAN Supervisor, including terminal servers, need to be upgraded.

- **Software Licensing**

No additional licensing requirements are applicable to existing users. For additional DATRAN Supervisor Client licences, please contact QTech sales at [sales@qtech.co.nz](mailto:sales@qtech.co.nz).

- **Close Applications**

Before installing it is recommended that you close all applications running on the target machine.

- **PC Reboot**

No rebooting of the target machine is required after the installation.

## Summary of New Features

The following new features have been introduced into DATRAN Supervisor Version 3.63

QTech ID	Description
4369	Get Top 100 sites, alarms, etc. just like in SQL Server Management Studio 2008.

## Summary of Resolved Issues

The following issues have been resolved since DATRAN Supervisor Version 3.62 was released.

QTech ID	Description
6739	Current Alarms screen no longer crashes when it is run by the Main menu -> Recent History
6706	Acknowledging alarms when using non standard settings return to black text with a white background.
6705	When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by the dialog box "set alarm background colour".
6591	Operator Edit in operator List window repaired.

## Disclaimer

While every endeavour has been made to ensure that the product description is accurate, details are subject to change. QTech Data Systems Ltd reserves the right to alter the product and system specifications if required. It is QTech's firm intention to continue to develop the features of the DATRAN VI product range and add additional modules.

QTech Data Systems Ltd does not warrant the suitability of this product for any particular application as the conditions in which the application is used are beyond QTech's control. This is not withstanding warranty of merchantability.

Many systems are now connected to the Internet. QTech Data Systems Ltd cannot guarantee these services as being available or functional all of the time as network connections are beyond QTech's control.

## Ongoing Support

QTech Data Systems Ltd encourages clients to configure their systems to allow remote access via a direct connect modem or Internet based VPN. This allows for off-site support from QTech staff.

QTech Data Systems Ltd provides options for support services maintenance agreements, please talk to your QTech sales representative. Support services outside the scope of any maintenance agreements shall be charged at QTech's standard Engineering Support hourly rate plus disbursements.
