Introduction

QTech advise that we have released DATRAN DLP IDE Software Application version 4.05.

QTech views this as a minor upgrade as it fixes a compiling issue when using Macros.

The following sections of this document describe the enhancements and the installation prerequisites. Your feedback on the product and possible future enhancements is always appreciated.

Summary of New Features and Modifications

The following update has been introduced into DATRAN DLP IDE v4.05.

Updates

A fix is provided for an issue that caused DLP programmes using macros to not build and compile properly. The symptom was a build error “An internal exception of type ERangeError occurred with the message: Range check error”.

Known Issues

Software License Key

The previous improvements made in DLP IDE v4.04 for Windows 10, and IT privilege restrictions, changes where the license key is stored. This change may create issues for users updating from prior versions of DLP IDE.

The symptom is the licence key cannot be found, and the application will not run properly. The resolution is to re-apply the licence key so that it is stored in the new location.

If you do not have a properly licenced copy of the application or cannot find your licence key, please contact us for assistance.

Prerequisites for Upgrade

This version replaces all previous versions of DATRAN DLP IDE.

Backward Compatibility

This is a full release version and replaces all existing versions.

Software Licensing

No additional licensing is required for registered users and multiple user licenses are available as required.

Close Applications

It is recommended that all applications running on the target machine be closed before an update is started.

PC Reboot

The Target Machine does not have to be restarted after the installation.

Ongoing Support

QTech Data Systems Ltd encourages clients to configure their systems to allow remote access via a directly connected modem or internet-based VPN. This allows for off-site support from either QTech Data Systems Ltd staff, or in-house staff outside of work hours.
